CAREER SUMMARY

Data and Operations Analyst with experience in banking operations, international payments, compliance, and process optimization at Deutsche Bank. Proficient in SQL, Python, Excel, Tableau, and Power BI, with demonstrated expertise in payment data analysis, audit support, and strengthening control-focused operational processes. Seeking to leverage analytics and financial systems knowledge in fraud and risk strategy roles.

TECHNICAL SKILLS

Programming & Development: Python, Java, C, C++, C#, R, JavaScript, HTML, CSS, Data Structures

Databases & Analytics: SQL, MySQL, Oracle Database, Machine Learning, Data Analysis, Data Visualization, Business Intelligence, Tableau,
Power BI, MS Excel

Tools & Platforms: Cloud Computing, Git, GitHub, Docker, Linux/Unix, Windows, JIRA, Figma, MS Word, MS PowerPoint, OneNote

PROFESSIONAL EXPERIENCE

OPERATIONS ANALYST| Deutsche Bank | Bengaluru, India — Aug 2023 – Aug 2024

- Analyzed high-volume international payment transactions using SQL, Excel, and internal banking systems to identify exceptions and reduce processing errors, strengthening operational risk and compliance controls.
- Partnered with compliance and audit teams to review payment workflows and transaction verification processes, supporting regulatory adherence and improving control effectiveness across cross-border payment operations.
- Built data reports and dashboards using Tableau and Power BI to monitor payment activity, detect unusual transaction patterns, and provide insights that improved operational decision-making.
- Investigated payment discrepancies and coordinated with operations and compliance teams to resolve transaction issues and strengthen verification workflows.

BUSINESS ANALYST INTERN | Verezo with IBM. | Bengaluru, India — Jan 2022 – Jan 2023

- Cleaned and preprocessed large datasets using Python (Pandas, NumPy), handling missing values, outliers, and inconsistencies, while optimizing SQL/MySQL queries for efficient data extraction, aggregation, transformation, and ERP database management.
- Conducted EDA to identify trends and correlations, developed dashboards and visualizations using Python (Matplotlib, Seaborn), Tableau, and Power BI, created reports and presentations, collaborated with data engineers and business stakeholders to define KPIs, and documented workflows using Visio and Lucid chart.

EDUCATION

MASTER OF SCIENCE | Information Systems and Technologies | University of North Texas — Dec 2025
BACHELOR OF COMMERCE HONOURS | Finance and Business Analytics | Jain University — Jun 2023

PROJECT

CLEANING AND ANALYZING THE DATA OF SUPERSTORE SALES USING PYTHON AND AI TOOLS.

- Applied data preprocessing and machine learning models (K-Means, Random Forest, XGBoost, MLP, CNN) to analyze sales data, perform customer segmentation and demand forecasting, and deliver insights using Python(Pandas, NumPy, Matplotlib, Seaborn, Stats models) and Excel.

Social Media Engagement Analytics (Tableau)

- Developed dashboards to analyze engagement by sentiment, platform, time, and geography, identifying optimal posting times, high-performing platforms, and key regions.

CLEANING AND ANALYZING THE DATA OF TRANSPORTATION CARRIERS

- Developed a solution to automate and reduce data cleaning time, enabling trucking carriers to analyze how pricing, geography, and operational factors impact revenue using Python and Excel.
